## ARCHITECTS' ROSTER QUESTIONNAIRE

### TO EVERY ARCHITECT IN THE UNITED STATES AND ITS POSSESSIONS:

The Architects' Roster is maintained by The American Institute of Architects as a service to the profession as a whole and to agencies of the United States Government. Every registered architect, whether or not a member of The Institute, is eligible for inclusion in the Roster. The Institute maintains custody of the Roster, keeps it up to date and in good order for use. The Roster is available to any representative of the Government and to representatives of foreign governments in Washington. Reference may be made to The Architects' Roster in negotiations with government agencies and other interested parties. Experience with the Roster since its establishment in 1946 has shown its usefulness. Growing out of an earlier Register of architects qualified for public works, The Roster provides at The Octagon an accurate, current record of the qualifications and achievements of members of the profession. It allows a positive and helpful response to requests for factual information on architects, and in that way constitutes a service to the profession.

The American Institute of Architects assumes no responsibility for the accuracy of statements made in this Questionnaire. The obligation to maintain this record as a current description of an architectural firm rests with the firm, and supplementary record forms are available for this purpose.

February 24, 1953.

The Architects' Roster  
The American Institute of Architects  
1735 New York Avenue, N. W.  
Washington 6, D. C.

Gentlemen:

I have been associated in a joint venture with Mr. Lester C. Haas for government work, however, due to the amount of private work in my office, I would not be able to adequately handle any government work at this time, so we are dissolving the joint venture.

This joint venture has been very satisfactory and is dissolved at this time only because of the press of my private practice.

Yours very truly,

A handwritten signature in cursive script, appearing to read "W. S. Evans".

cc: Mr. Haas

## MODERN APARTMENT INTRODUCED IN MILL TOWN

*The Parkview Apartments, Springhill, La.*

*Lester C. Haas, Architect*

Joseph W. Molitor

Hinged sliding doors between living room and porch afford "outdoor" living during most of the year. Efficiency units have ventilating wood louvers below and glass transom sash above fixed glass on south wall. Clerestories provide light and ventilation in kitchens and baths. Kitchen work counters in all apartments have sliding table tops that protrude through walls to form end tables for telephones, etc., and extend their full length to serve for dining or study

THE OPEN "U" SHAPE of this apartment provides many attractive features not usually found in the conventional apartment building. Each of the eight one-bedroom units on the ground level has its own screened porch, which serves as a private entrance to the living quarters inside. The eight efficiency apartments at the back of the "U" are elevated, assuring privacy and permitting better ventilation and view than would be possible on ground level at that particular end of the building. This also allows for on-site, sheltered parking, service facilities and a central heating plant beneath the units. Heating of each unit is by ceiling radiant panels. Bearing walls and unit separations on ground floor are brick — exposed on the inside to minimize maintenance and decoration costs. Roof is lightweight insulating concrete — covered by reflective aluminum roofing.
