QUESTIONNAIRE FOR ARCHITECTS' ROSTER AND/OR REGISTER OF ARCHITECTS QUALIFIED FOR FEDERAL PUBLIC WORKS

TYPING IS MANDATORY. PARTNERSHIPS SHOULD MAKE A JOINT RETURN ONLY. Pink copy is to be retained by the author; other copies to be mailed to The American Institute of Architects, 1741 New York Avenue, N. W., Washington 6, D. C.

- 1. (a) FIRM (individual or partnership) Charles C. Hartmann, Architect
(b) FORMER FIRM, if any
2. BUSINESS ADDRESS 120 Jefferson Standard Building
3. YEAR ESTABLISHED Nineteen Hundred and Twenty One ( 1921 )

4. PERSONAL HISTORIES OF PRINCIPALS
Name of Principal: Charles C. Hartmann
Name of Principal:

Furnish data complete, but keep to essentials. Describe each member of firm individually; if more than two, append extra sheets.

- (a) Date of Birth June 11th, 1889
High School
(b) Education Mechanic Institute -Baux Arts Institute )
(c) Experience Prior to Own Practice
(Give architect or architectural firm affiliations, positions held, and approximate dates of employment.)
Warren and Wetmore 1905 (Apprentice-
Charles E. Birge 1907 (Draftsman-
W.L. Steddart Head Draftsman & Associate Partner until 1921
(d) Commenced Practice January 1921
(e) Number of Years a Principal Twenty Five

7. SUMMARY OF PROJECT COSTS:

	Largest Single Job	All Jobs Valuation	Annual Average
Work Completed 1930-1940	\$ 500,000.00	\$ 500,000.00	\$1,000,000.00
Work Completed 1941-1946	300,000.00	200,000.00	500,000.00
Current Work under construction or working drawings authorized	\$1,500,000.00	\$ 1,500,000.00	\$ 3,000,000.00

8. REPRESENTATIVE WORK FOR WHICH YOU WERE ARCHITECT OR WERE ASSOCIATED WITH OTHERS:

(a) Three Projects Not Exceeding Cost of \$300,000:

Name of Project	Cost	Location	Owner
Lexington Memorial Hospt.	\$ 264,000.00	Lexington N.C.	Trustees
Port City Hosiery Mills Inc.	120,000.00	Wilmington N.C.	J.K.Voehringer
Belks Department Store	225,000.00	Greensboro N.C.	Belk Co.

(b) Three Projects Costing From \$300,000 to \$1,000,000:

Name of Project	Cost	Location	Owner
Country Club Apartments	\$ 525,000.00	Greensboro N.C.	Julian Price
First National Bank Bldg.	500,000.00	Wilson N.C.	First Natl. Bank
Highsmith Hospital	500,000.00	Fayetteville N.C.	Dr. J.F. Highsmith

(c) Three Projects Costing Over \$1,000,000:

Name of Project	Cost	Location	Owner
Jefferson Standard (Life Insurance Co.)	\$ 1,300,000.00	Greensboro N.C.	Jeff. S. Life Ins. Co.
Greensboro City Schools	3,000,000.00	Greensboro N.C.	City of Gbro. N.C.
Commercial Natl. Bank Bldg.	1,200,000.00	High Point N.C.	Com. Natl. Bank.

**9. PHOTOGRAPHS/PHOTOSTATS:**

The author submits herewith photographs or photostats (size 8" x 10") of several buildings for which he has been the Architect, as follows: (N.C.A.R.B. presentation acceptable.)

.....Jefferson Standard Life Insurance Co. Building.....  
.....Country Club Apartments.....  
.....  
.....

**10. COLLABORATION WITH JUNIOR ARCHITECTS:**

(a) If an established individual or firm, are you willing to collaborate with other firms or individuals which would permit junior architects to qualify and help further their professional careers?

.....YES.....

(b) If in private practice at this time, name associates (if additional architects are to be added to your organization) for the purpose of qualifying:

.....  
.....  
.....

(c) If **not** in private practice at this time, name established architect or firm with whom you have agreed to collaborate, for the purpose of qualifying:

.....

11.(a) I/We wish to be  included in the **Architects' Roster**  
do not wish to be

(b) I/We would like to be  considered for the **Register of Architects Qualified for Federal Public Works**  
do not wish to be

I/We hereby certify that the above is a true statement of facts.

The fine seventeen-story office building owned by the Jefferson Standard Life Insurance Company, of Greensboro, North Carolina.

Main Lobby, Jefferson Standard Building. Black and Gold, Tavernelle, Belgian Black and Alabama Cream A marbles were used here.

building. The seventeenth floor is given over partly to a company restaurant, with all the machinery attendant upon a complete culinary department; and partly to the social or recreation rooms of the men and women employees of the Company. The possibilities of this type of welfare work are rapidly gaining country-wide recognition. These rooms, located as they are in the very top of the building, are especially suitable for their purpose, as they offer a full view of the surrounding country for many miles in all directions.

The building contains, besides the Insurance Company's quarters, three hundred modern business offices above the ground floor and basement. The ground floor is devoted to the ample and modern quarters of the Atlantic Bank and Trust Company, a fast growing banking institution, whose

rooms are one of the chief features of the building. There are also on this floor, five spacious stores containing all up-to-date requirements for the carrying on of retail trade, with both street and building entrances.

There are two large public entrances to the building, and these enter under a spacious arcade leading directly to the elevators, five in number. Both entrances and arcade are finished in a beautiful combination of various marbles. The entire floor is laid out in checkerboard pattern with white and black squares of White Alabama and Belgian Black marbles. The wall up to the ceiling and including the arched ceiling beams is a treatment of Rosetta marble panels trimmed with Black and Gold marble base and stiles. The ceiling treatment is of Gultavin's tiles, of colors in

Commercial National Bank Building at  
High Point, North Carolina.

## TWO SOUTHERN STRUCTURES

Modern Office Buildings Recently Erected in High Point  
and Greensboro, North Carolina

DOWN in North Carolina there is a town of less than twenty-five thousand that boasts of an annual production of manufactured articles amounting in value to twenty-five million dollars; a town that contains a ten-story office building that cost over one million dollars, thirty-five churches, besides a fine Y.W.C.A. and a Y.M.C.A. building, two railroad systems, thirty miles of paved streets and a population almost one hundred per cent native. Incidentally four out of every five people own their homes. This bustling town is High Point and North Carolinians call it

their "Industrial City." The aptness of this title is substantially borne out by its one hundred and fifty industries, mostly furniture factories, wood-working plants and textile mills. In fact, High Point is the center of the furniture industry in the South, the trade having its general headquarters in the big Southern Furniture Exposition Building, with its six and a quarter acres of floor space. The story of the growth and development of the town is equally the story of the financial institution that was the strength back of the financial progress—the Commercial National Bank of

strict harmony with the marble treatment of the walls. Over the five elevators are mosaic tile panels in which are incorporated the state and city seals, surrounded by the state flowers; the well-known historical portrait of Thomas Jefferson, after whom the Jefferson Standard Life Insurance Company is named, signing the Declaration of Independence; and historical views of the city's important street, shown in the mosaic panel treatment. This lofty and broad arcade with its rich and dignified combination of domestic and imported marbles, is decidedly attractive and it is a fine example of intelligent architectural design employing materials that are at the same time beautiful and durable.

The building is served by five high-speed, multi-voltage, micro-drive Otis elevators of the latest design, so as to automatically

The Stairway leading from Lobby to Mezzanine Floor. In the slab of Alabama Cream marble forming the bottom of the soffit was found a coiled snake, petrified.

stop flush with every floor, and each car is fully equipped with the most modern safety appliances.

Throughout the typical floor, elevator lobbies and office corridors, and in all toilet rooms, Cream A Alabama marble has been installed as a wall lining, with a marble mosaic floor of a combination of domestic marbles, with a white field and a three-colored border.

In speaking of the season for choosing these materials, the architect said: "By having these corridor and elevator lobbies entirely of marble, there results an appearance of cleanliness, solidity and permanency which cannot be equaled by the use of any other material. However, there is no heaviness or undue

The Atlantic Bank and Trust Company's quarters in the Jefferson Standard Building.

severity; rather the general effect is one of dignified simplicity most practical for a building continually in use day and night by the general public."

The quarters occupied by the Atlantic Bank and Trust Company on the ground floor, mezzanine and basement portions are devoted entirely to the banking business. The Safe Deposit Department with its modern fireproof and burglar-proof vaults, is in the basement. These vaults are the largest of any Southern bank and were designed in conformity with the specifications and methods approved by the Federal Reserve Bank of New York. The floor treatment throughout this portion is of marble terrazzo panels with borders and inserts of Gray Knoxville marble. The wall lining and pilaster and cornice treatment of the cages and office counters is all of Pink Tennessee marble, selected and matched for veining of simple design. The surface sustains a highly polished finish. Above, the walls and ceilings are treated in jointed Caen stone in harmony with the marble below, and they blend in design and color. This treatment, together with the thirty-inch thick steel vault door and steel vault facing, gives a feeling of security and strength to this particular department of the institution.

The main banking room, on the ground

level, is entered from both streets and also from the building arcade. The street entrances are especially handsome, with Gray Knoxville marble on the outside and Tavernelle within. The head stones are beautifully carved. The floor of the main banking room is of marble tile. The wall lining is composed of coined blocks of selected Tavernelle Claire marble; the carved caps, the offices, the counters, rail, as well as banking cages, cornices, pilasters and crests, are all of selected Tavernelle Claire marble of polished and honed finish designed in the Italian Renaissance period. These give the banking room an appearance of refinement and richness in keeping with the dignity of the institution. The wall above the marble treatment is laid up of Travertine stone slightly embellished with historical shields. Above, the plaster-tinted ceiling with its unbroken treatment of coffers, sets off the room and makes it one of the best proportioned banking chambers in the South.

The exterior design is mostly free Romanesque, with a Gothic influence, with a classic lower-story treatment. Granite, marble and terra cotta in combination were used for the full height. While the building is seventeen stories above the street, the long, vertical lines accentuate the height, causing it to appear much loftier than it actually is.

A typical upper corridor in the Jefferson Building, showing use of Alabama Cream A marble

Main Entrance to the Jefferson Standard Life Building on North Elm Street, Greensboro, North Carolina.

basement and two on the main floor, comprising a feature of safety that was considered desirable. Very modern methods were used in their construction, as well as in the heating and ventilating systems. The building is one which meets a real community need, and it is a most valuable addition to that thriving Southern town.

Greensboro, North Carolina, has the distinction of being the home of the largest insurance company in the South. The Jefferson Standard Life Insurance Company, organized on a modest basis not so many years ago, surprised its sponsors by its rapid growth, until today it occupies a most favorable position in its particular field. The Company very rapidly reached the point where it was deemed advisable to

build a new home for itself, and the new Jefferson Standard Building, recently built after plans by a Greensboro architect, Charles C. Hartmann, reflects confidence in the future of the South.

The structure was especially designed to comply with the requirements of conducting the insurance business along the lines that had proved so successful in the past, and all the modern features that experience had shown to be necessary were installed on the floors intended to be occupied by the Company. The Jefferson Standard, as a result, possesses quarters that, in planning and equipment, are perhaps second to none in the country.

The Insurance Company occupies the six top floors of this seventeen-story office

High Point.

Organized thirty-three years ago with a capital stock of fifty thousand dollars, it opened for business in 1891 with twenty-five thousand dollars capital paid in. Today its capital stock is half a million. An even more vivid comparison is shown by the difference between the resources then and today. The records of the first day's business disclose the fact that deposits totaling about five thousand dollars were made, and the total resources were about thirty thousand dollars. A recent statement shows resources of nearly nine millions with deposits of close on to six millions of dollars.

The growth of the bank soon brought to the front the question of enlarged quarters, with the result that about three years ago, a lot was purchased on South Main and West Commerce Streets, fifty by one hundred and fifty feet, in the business center and across from the Post Office. Here was erected a nine-story building, the first floor, as well as the basement and mezza-

nine, being occupied by the Bank, with the remainder rented out as offices.

The architect, C. C. Hartmann, of Greensboro, North Carolina, had in mind the position of dignity and character the institution had always occupied in the community, and made free use of marble in the structure. The large entrance lobby, as well as the elevator lobby, is finished in imported marble, this material appearing in the floors and walls as well as in the circular stairways. The banking room, entered directly from the building entrance lobby, has walls, floors and counters entirely of marble. Caen stone was used for the walls, while both imported and domestic marbles were used in floors and counters. The room, done in the Italian Renaissance style, affords a clear unobstructed working space, free from columns, and well lighted by the large arched windows that extend to the top of the high ceiling.

The vault equipment is especially comprehensive, a total of four vaults, two in the

## REMODELED BANK

**SECURITY NATIONAL BANK, GREENSBORO, N. C. CHARLES C. HARTMANN, ARCHITECT.** An entire new floor was introduced in the middle of the 27-ft. height of an old-school Italian Renaissance banking room. On the new upper level are departmental offices. On the main floor, shown here, work areas are arranged around the perimeter of the rectangular floor space. Introduction of air-conditioning ducts indicated the regular pattern of enclosing ceiling beams, which form coffer. The entire ceiling area is surfaced with acoustical tile. Fluorescent tubing in 4-ft. lengths, mounted in each coffer, provides 75 foot-candles at desk height. The columns are cased in enamel-finished steel; floors are rubber tile. In place of teller stalls, individual rolltop compartments (see section) are provided at intervals in the uninterrupted counter.

## ARCHITECTS' ROSTER QUESTIONNAIRE

### TO EVERY ARCHITECT IN THE UNITED STATES AND ITS POSSESSIONS:

The Architects' Roster is maintained by The American Institute of Architects as a service to the profession as a whole and to agencies of the United States Government. Every registered architect, whether or not a member of The Institute, is eligible for inclusion in the Roster. The Institute maintains custody of the Roster, keeps it up to date and in good order for use. The Roster is available to any representative of the Government and to representatives of foreign governments in Washington. Reference may be made to The Architects' Roster in negotiations with government agencies and other interested parties. Experience with the Roster since its establishment in 1946 has shown its usefulness. Growing out of an earlier Register of architects qualified for public works, The Roster provides at The Octagon an accurate, current record of the qualifications and achievements of members of the profession. It allows a positive and helpful response to requests for factual information on architects, and in that way constitutes a service to the profession.

The American Institute of Architects assumes no responsibility for the accuracy of statements made in this Questionnaire. The obligation to maintain this record as a current description of an architectural firm rests with the firm, and supplementary record forms are available for this purpose.

---

### PARTNERSHIPS SHOULD MAKE A JOINT RETURN ONLY.

Original and one copy to be mailed to THE ARCHITECTS' ROSTER, The American Institute of Architects, 1735 New York Avenue, N. W., Washington 6, D. C. One copy to be retained by the author.

- 1 a FIRM** (Indicate whether individual, partnership or corporation.)  
CHARLES C. HARTMANN, ARCHITECT, partnership  
HARTMANN-WATSON & HART, associated for governmental purposes only.
- b FORMER FIRM**, Name if any... CHARLES C. HARTMANN, ARCHITECT 2-1659
- 2 STREET ADDRESS** North Elm Street **Phone** 4-3108
- 3 YEAR ESTABLISHED** 1950

#### 4 PERSONAL HISTORIES OF PRINCIPALS

Furnish data complete, but keep to essentials. Describe each member of firm individually; if more than four, append extra sheets.

	Charles C. Hartmann	Charles C. Hartmann, Jr.
	NAME OF PRINCIPAL	NAME OF PRINCIPAL
a	Date of Birth June 11, 1890	March 15, 1918
b	Place of Birth Brooklyn, N. Y.	Brooklyn, N. Y.
c	Education Grade, High, College-M.I.T., Trade School & Beaux Arts Inst.	Grade, High School, Architect by written exam. 15 years practical exper.
d	<b>Experience Prior to Own Practice</b> (Give architect or architectural firm affiliations, positions held, and approximate dates of employment.)	
	Warren & Wetmore 1905 - Apprentice	1935-1936-C.W. Angle, Contractor
	Charles E. Birge 1907 - Draftsman	Assistant to Superintendent
	W. L. Stoddart 1909 - Head Drafts- man and Associate partner until 1921	1936-1937-Geo. W. Kane, Contractor Assistant Superintendent 1937-1942-Charles C. Hartmann, Architect, Draftsman & Chief Draftsman
	1943-1944 Raymond Concrete Pile Company, Chief Construction Eng.	1942-1943-Doyle & Russell, Contractors, Head of Architectural Department. Continued on left.

ARCHITECT - ENGINEER FIRM DATA  
 NavDocks 382 Rev.1-48

INSTRUCTIONS

Fill this form out completely and support with the following information all of which should be submitted on sheets not larger than 8 1/2" x 11". In order to avoid duplication, it will not be necessary to supply any of the information which has been previously submitted.

- (a) A complete experience record during the last five or ten years. This should be listed by years, showing clients by name and projects, by type, location and cost.
- (b) Organization available with brief personal history of key personnel.
- (c) A financial statement of recent date.
- (d) Letters of commendation from recent clients. (3 to 5).
- (e) Five photographs or planographs, each not to be larger than 8 1/2" x 11", of representative recent buildings. Where desirable, small photographs mounted on 8 1/2" x 11" sheets will be satisfactory. It is intended by the above requirements to avoid the expense and difficulty of handling incurred by the assembling of photographs into large albums. Such photographs upon receipt will be inserted in file jacket with other supporting data.

SECURITY NATIONAL BANK  
GREENSBORO, N. C.

December 21, 1951.

TO WHOM IT MAY CONCERN:

Mr. Charles C. Hartmann, Architect, 120 Jefferson Standard Building, Greensboro, N. C., has maintained a satisfactory account and relationship with this bank for many years, with balances averaging medium to high five figures during the past several years.

In the absence of any request for loans we have had no occasion to make any close investigation of his affairs or to review a financial statement, but in view of the foregoing, we are of the opinion he has sufficient capital in his business to provide for his full requirements.

We think well of Mr. Hartmann's organization, he is a person of excellent character and general standing in the community, and is considered to be a thoroughly experienced and competent Architect.

Yours very truly,

Hugh P. Beal  
Vice President

COBLE DAIRY  
LEXINGTON, N. C.

Mr. F. J. Boling, President,  
Chatham Hospital, Inc.,  
Siler City, North Carolina.

Mr. Charles C. Hartmann, Architect of Greensboro, North Carolina, advised me that he was trying to get the job of Architect for your Hospital. I am writing this on my behalf, passing on to you the information that I have seen and experienced regarding Mr. Hartmann, in connection with our Hospital.

His services with us in drawing plans, making sketches, etc., for our proposed Hospital project have been 100% and I am sure that if you will secure Mr. Hartmann's services, you will not go wrong.

We are putting on a drive at this time and I am sure that we will raise at least \$250,000.00. If we can be of any further service to you, do not hesitate to call on us.

Yours truly,

George S. Coble, Treasurer  
Davidson Hospital, Inc.

BELK'S DEPARTMENT STORE  
GREENSBORO, N. C.

TO WHOM IT MAY CONCERN:

We can heartily and sincerely recommend Mr. Charlie C. Hartmann as an outstanding, capable and thorough Architect.

Several years ago we had Mr. Hartmann to design and build our present building on Jefferson Square, Greensboro, N. C., and during the construction of said building; we had an opportunity to observe his skill and ability, which we found of the highest.

In construction our building we found Mr. Hartmann very conscientious, as to seeing that the Contractor lived up to the letter of the contract. We found during this period of time that Mr. Hartmann was very patient when it was necessary to make any new drawings, due to slight changes here and there in the building program.

We began construction of our building in late January 1939 and moved into same September the same year.

If we were going to build again today we would not think of securing any other Architect other than Mr. Hartmann, as we are thoroughly satisfied in every detail.

Yours very truly,

BELK'S DEPARTMENT STORE

J. A. May

JEFFERSON STANDARD LIFE INSURANCE COMPANY  
GREENSBORO, N. C.

TO WHOM IT MAY CONCERN:

This is to advise that I have known Mr. Charles C. Hartmann since 1928, at which time he was employed as Architect for our seventeen story building erected in 1922 and 1923. It is about a two and one-half million dollar building. Since that time we have used him on a number of jobs and his work has been entirely satisfactory.

Aside from the contacts I have had in connection with the work he has done for us, I see him frequently as he has offices in our building.

I do not know of nor have I heard any criticism whatever of his morals or character, and I would consider him one of the outstanding Architects in this section.

I understand he has made, or is making, application for some Government work as Architect, and I would not hesitate to recommend him highly both from the standpoint of ability and application of duty.

If I can be of any further assistance or answer any specific inquiries, please do not hesitate to write me.

Yours very truly

C. E. Leak

MOCK, JUDSON, VOHRINGER COMPANY  
GREENSBORO, N. C.

TO WHOM IT MAY CONCERN:

This is to state that Mr. Charles C. Hartmann, Architect, of Greensboro, N. C., has been doing all work connected with our plant expansions since 1928.

The circumstances of our contact with him may be interesting insofar as our first building was 100' x 100' which he did not supervise and with which we had considerable trouble with vibration. On our first addition to this original building we contacted Mr. Hartmann explaining our difficulties, and his recommended design was adopted which completely eliminated any vibration due to our heavy machinery.

Mr. Hartmann subsequently supervised two other additions to our Greensboro Plant which is now approximately 800' long with almost 200,000 square feet floor space. He also constructed an addition to our plant in Decatur, Alabama, and another in Siler City, N. C.

We believe the above will prove what we think of his services which have always been satisfactory and at no time did we have any complaints regarding his ability and integrity. He does not hesitate to call the contractors when he believes anything is wrong but at the same time tries to be fair.

Very truly yours,

MOCK, JUDSON, VOHRINGER CO., INC.

John K. Voehringer, Jr., Pres.

PILOT LIFE INSURANCE COMPANY  
GREENSBORO, N. C.

TO WHOM IT MAY CONCERN:

Mr. Charles C. Hartmann, Architect of Greensboro, N. C., has done work for the Pilot Life Insurance Company and for me personally on many occasions during the past ten or fifteen years. I recall two jobs in particular, one involving an expenditure of \$365,000.00 and the other \$80,000.00 this work having been done in the past three or four years.

I consider Mr. Hartmann a most capable Architect and should our Company or I personally need Architectural service in the future we would most assuredly employ him.

Very truly yours,

E. C. Green  
President

THE DUKE ENDOWMENT  
CHARLOTTE, N. C.

TO WHOM IT MAY CONCERN:

This is to say that I have known Mr. Charles C. Hartmann, an Architect of Greensboro, North Carolina, for fifteen years, I have had a number of conferences with Mr. Hartmann in regard to hospital planning and construction and he has designed a number of such institutions in his state. His work has given general satisfaction, not only to the communities concerned but to this office. He is familiar with sound fundamental principles of hospital designing, takes a great interest in his work, and gives a great deal of intelligent attention to details.

Respectfully submitted,

W. S. Rankin, M. D.  
Director
