REMARKS RE QUALIFICATIONS.

The following is a brief summary of my experience.

My private practice as an individual has consisted mainly of the design and supervision of the construction of small commercial buildings and the remodeling of stores, offices and apartments. In addition to the above work in design I am thoroughly skilled in the preparation of estimates, property appraisals and specifications.

During the severe earthquake in Helena, Montana in 1936, I was called upon by that city to appraise and inspect the damage to property, which gave me an opportunity to observe the effect of earthquake stresses in structures.

My experience also includes industrial projects and some institutional work.

As an employee of the Anaconda Copper Mining Co. during 1941 to 1944, I was instrumental in the planning and design of all buildings at the Chrome Development Projects for the Defense Plant Corporation. This work included the erection of two separate plants, each consisting of site and utility development which included housing, employee dwellings, mess halls, bunk houses, community and recreation buildings, stores, schools, hospital and the plant buildings and shops.

I believe that my experience, character and personal ability should enable me to handle any type of work which I might be called upon to do.
