Post Office at Harrisburg, Pa., under Act of Congress of August 24, 1912

REMARKABLE INVESTIGATIONS OF HORIZONTAL CURVATURES

by such work, that they may ultimately, in whole or in part, be revealed for practical use. So, though we cannot say who will build the laws, or reconstitute them, nor when, we are assured that the material for such illuminating rediscovery and revival cannot be too fully or too painstakingly assembled; that its value is beyond our powers of calculation.

We hope that Professor Goodyear's researches may be widely extended, and that

they may be most carefully preserved, in such wise as to make them at all times and permanently available to all those who shall possess enough of interest and intelligence to make use of them.

Committee of the New York Chapter appointed to report upon the work of Professor Goodyear.

HENRY BACON
EGERTON SWARTWOUT
C. GRANT LA FARGE, *Chairman*
