## Academic Center Proposed As First, Post War Project

Picture of rendered drawing showing Georgia Tech's proposed Post War "Academic Center," viewed as a birdseye perspective from Fifth Street and Hemphill Avenue.

Beginning from the left, as delineated, the Center will include the Library which connects with the Administration wing; then the Memorial-Museum unit in the center, with a large Class Room wing, projecting from the right.

The main automobile entrance, as shown, will approach from the western boundary of the new campus, curving in from Fourth Street and terminating in front of the present Research Building,

as outlined in the upper left corner of the picture. The campus will project toward the east, at the upper portion of the view; and a large plaza and pedestrian entrance to all buildings will be located by the side and in front of the present Physics Building, as sketched, in the upper center. A view of the present Mechanical Engineering Building is shown in the upper right section; its pedestrian entrance faces north, like that of the Academic Center. The plan is designed to allow for additional expansions.

An article on the entire expansion plan will be published in an early issue of the ALUMNUS.
